

ICT in Digital Citizenship and Online Etiquette

SUBJECT : Introduction to Information and Communication Technologies

COURSE CODE : IT-1502

BATCH : 2025/fall

PREPARED BY : Engr. Motia Rani

Department of Cyber Security

Introduction

- Digital citizenship refers to responsible and safe use of technology.
- Includes behavior, communication, and safety online.
- It shapes how others see us on the internet.
- Key focus: identity, communication, and online safety.

What Is Digital Citizenship?

- The ability to use digital technologies safely, ethically, and responsibly.
- Applies to social media, email, messaging, learning platforms, and online communities.
- Good digital citizens respect others and protect themselves online.

Digital Identity

Your online identity is created through:

- Social media profiles
- Online posts & comments
- Photos, likes, and shared content
- Everything you do online leaves a **digital footprint**.

Online Reputation

- Online reputation = how others perceive you based on your digital activities.
- Employers, teachers, and universities may check your online presence.
- A positive online reputation builds trust.

How to Build a Positive Online Reputation

- Share helpful, respectful content
- Think before posting
- Avoid offensive or harmful comments
- Protect your privacy settings
- Be consistent and truthful online

What Is Netiquette?

- Netiquette = “Internet Etiquette”
- Refers to polite and respectful behavior on the internet.
- Applies to emails, social media, forums, chats, and online classes.

Rules of Netiquette

- Be respectful in all communication
- Use clear and polite language
- Avoid using ALL CAPS (it looks like shouting)
- Stay on topic
- Give proper credit when sharing someone's work
- Avoid spreading rumors or false information

Respectful Online Communication

- Listen before responding
- Avoid arguments and personal attacks
- Respect different opinions
- Use emojis or tone indicators when needed to avoid misunderstanding
- Follow community guidelines

Cyberbullying – Definition

- Cyberbullying: using digital platforms to harass, threaten, or humiliate others.
- Can occur on social media, messaging apps, games, or email.
- Includes spreading rumors, posting harmful content, or sending hurtful messages.

Forms of Cyberbullying

- Name-calling or insulting messages
- Spreading false rumors online
- Sharing private photos without consent
- Threats
- Excluding someone from online groups
- Impersonation

Impact of Cyberbullying

- Stress and anxiety
- Loss of confidence
- Fear of using digital platforms
- Decline in academic performance
- Long-term emotional damage

How to Prevent Cyberbullying

- Think before you post
- Don't respond to bullies
- Block and report abusive accounts
- Keep evidence of harmful messages
- Talk to a trusted adult or authority
- Use privacy settings wisely

Staying Safe & Responsible Online

- Protect your personal information
- Keep passwords strong
- Avoid sharing private details publicly
- Report suspicious or harmful activity
- Be kind and supportive online
